Perú**

Ministerio de Hacienda - Paraguay

**Ministerio de Planificación
(MIDEPLAN) - Costa Rica**

**Oficina de Planeamiento y
Presupuesto (OPP) - Uruguay**

**Secretaría Técnica Planifica Ecuador -
Ecuador**

CONTRIBUTION TO THE SUSTAINABLE
DEVELOPMENT GOALS

Peer Review of the Project's Products

Description of the practice:

Sharing the project's products with peer entities in order to contrast and enrich them.

Once the evaluation products developed within the framework of the EVALÚA Project (elaborated by external consultants) are completed, they are made available to an evaluation monitoring committee where peer institutions from different countries, not necessarily involved in that evaluation, can make comments, corrections or suggestions for improvement.

Differentiating factors:

The common practice is that evaluation monitoring committees are composed of only some of the actors directly affected by the policies or programmes being evaluated. In this case, this differentiating factor through which other institutions in other countries with similar competences can assess the quality of the products has been introduced.

Impacts:

Introducing an additional element of external look at evaluations (beyond external consulting) allows to:

- Bring greater quality and legitimacy to evaluations.
- Enhance knowledge at the regional level about the evaluated subjects and about evaluation methodologies.
- Introduce additional expertise, since the institutions that complement the committees are counterparts and know the evaluation subjects.
- Generate a process of dialogue based on concrete elements.
- Improve analytical capacities.

The added value of Triangular Cooperation: (more information [here](#))

1. Building ownership and trust.
2. Promoting complementarity and increasing coordination in development cooperation.
3. Sharing knowledge and learning jointly.
4. Co-creating solutions and flexibility.
5. Enhancing the volume, scope and sustainability of Triangular Cooperation
6. Achieving global and regional development goals through strengthened partnerships for sustainable development.
